Summary

Motivated and detail-oriented Computer Science student with a strong foundation in Python, SQL, and data analysis, along with a growing understanding of financial markets and trading concepts. Skilled in analyzing data, building efficient applications, and solving real-world problems. Eager to apply technical and analytical skills in finance-oriented roles such as trading systems and risk analysis, with a strong interest in working on platforms like Murex.

Skills

- Python (Pandas, Data Analysis, Visualization)
- SQL (Joins, Aggregations, Query Optimization)
- Financial Markets Basics (Stocks, Derivatives, Risk Management)
- Data Analysis & Interpretation
- Web Development (HTML, CSS, JavaScript)
- Java
- MySQL
- Problem Solving & Analytical Thinking

Education

- **BE - Computer Science and Engineering, CGPA: 8.5**
University College of Engineering Nagercoil Apr 2026
- **XII - Higher Secondary, 8.65%**
Little Flower Girls Higher Secondary School May 2022
- **X - Secondary Education, 89%**
Little Flower Girls Higher Secondary School Apr 2022

Work Experience

Full Stack Developer Intern

Geosensing and Imaging Consultancy

Jan 2026 – Mar 2026
Meletthambanoor, Kerala

- Developed responsive web pages using HTML, CSS, and JavaScript for real-time projects.
- Worked closely with team members to design, test, and improve website features.
- Debugged and optimized web applications to enhance performance and user experience.

Projects

Stock Price Analysis using Python

Technologies: Python, Pandas, Matplotlib, YFinance

- Collected real-time stock market data using financial APIs.
- Performed exploratory data analysis to identify price trends and patterns.
- Visualized stock price movements using graphs and charts.
- Gained insights into market behavior and basic financial analysis.

Trade Data Analysis using SQL

Technologies: MySQL

- Designed and managed a structured trade database.
- Performed SQL queries using GROUP BY, JOIN, and aggregation functions.
- Calculated total investment, average price, and trade summaries.
- Demonstrated understanding of financial data processing and reporting.

ResumeIQ – Smart Resume Parsing and Shortlisting Tool

Technologies: Flask (Python), HTML, CSS, JavaScript, MySQL, n8n

- Developed a web-based system to parse resumes and generate evaluation scores.
- Automated interview and rejection emails using n8n workflows.
- Built responsive frontend and secure backend using Flask and MySQL.

Summarix – AI-Based Content Summarization Web App

Technologies: Python, Django, React.js, OpenAI API, SQLite

- Developed an AI web application to summarize text, PDFs, images, and YouTube videos.
- Used OpenAI API and NLP techniques to generate concise summaries.
- Built backend using Django and frontend with React.js.
- Implemented authentication and text-to-speech features.
